In the PINK with new fluorescent pink speaking points

Here are the fluorescent pink speaking points.

- Governor John Hickenlooper signed Senate Bill 16-068 concerning wearing fluorescent pink garments to hunt big game which became effective August 10, 2016.
- Authorized fluorescent pink as an **alternative color** to daylight fluorescent orange.
- Any person who hunts or take elk, deer, pronghorn, moose, or black bear with any firearm shall wear **solid** fluorescent pink or daylight fluorescent orange garments(camouflage pink or camouflage orange is not legal).
- The required color shall be a minimum of five hundred square inches to be worn as an outer garment above the waist, part of which shall be a hat or head covering visible from all directions.
- You may mix fluorescent pink and daylight fluorescent orange, e.g. they have to be separate garments such as a pink hat and an orange vest but **not** pink and orange together such as in a camouflage pattern on a vest or cap).
- No national-recognized study done on fluorescent pink.
- We will accept a product that is sold as fluorescent pink. Fluorescent Pink is not on the nanometer light scale.
- Pantone 806C** represents a good standard for fluorescent pink.
- We are encouraging companies unfamiliar with Pantone 806C or if they have questions to send in a copy of their pink fabric for review.
