

# SAFETY SPEAKING POINTS SERIES

## PINK

### Bright Pink joins Blaze Orange under new Wisconsin law.

- Governor Scott Walker signed Wisconsin Act 131 in January 2016.
- Authorized bright or fluorescent pink as an **alternative color** to blaze or fluorescent orange as the required color of 50 percent of hunting outerwear above the waist, including head cover, during gun-deer season.
  - **Exception:** Waterfowl hunters & those hunting small game during hours of darkness do not have to wear the required pink or orange.
- No national-recognized study done on bright or fluorescent pink.
- We will accept a product that is sold as fluorescent pink. Fluorescent Pink is not on the nanometer light scale.
- **Pantone 806C** represents a good standard for fluorescent pink.
- We are encouraging companies (if they have concerns) to send in a copy of their pink fabric for approval. SEND TO:
  - Hunter Education Administrator- Jon King
  - 101 S. Webster Street
  - Madison, WI 53707
- You may mix bright pink and blaze orange. Law is 50 % of either or both.
- You may wear camouflage pink, same as camouflage orange, as long at least 50% of the outer clothing above the waist is pink or orange.
